## EXPERIENCE

---

### Chup

Oct. 2023 – Present

#### Frontend Developer

- Developed scalable web applications with Vue.js and Nuxt.js
- Developed a library of reusable, well-documented UI components, reducing development cycles and ensuring cross-team consistency in the frontend architecture
- Engineered responsive, pixel-perfect user interfaces with a focus on accessibility and cross-browser compatibility to ensure a seamless experience for healthcare providers and patients
- Established rigorous Code Review processes to ensure code maintainability, type safety, and adherence to industry best practices
- Led the frontend development team in sprint execution, ensuring all features were delivered on schedule while maintaining high engineering standards

### Quantus Telematika Indonesia

Jun. 2019 – Sept. 2023

#### Frontend Developer

- Architected and delivered over 5 custom web applications for corporate clients using ReactJS, NextJS, or SolidJS, selecting the optimal framework based on project-specific performance and SEO needs
- Engineered reusable UI component libraries for large-scale design projects, reducing development time for subsequent project phases by ensuring consistency across clean and intuitive interfaces
- Leveraged TypeScript across projects to implement strict typing, significantly reducing runtime errors and improving codebase maintainability for long-term corporate projects
- Implemented TanStack Query to manage complex asynchronous data fetching, resulting in optimized caching, reduced redundant API calls, and a significantly smoother user experience
- Collaborated directly with UI/UX Designers to transform high-fidelity Figma/Adobe XD designs into pixel-perfect, interactive web experiences, focusing on simple and intuitive user interactions
- Implemented advanced performance tuning techniques, including code-splitting, lazy loading, and efficient state management

### Billionaire Store

May 2018 – Apr. 2019

#### Frontend Developer

- Translated high-fidelity UI designs into pixel-perfect, responsive web pages
- Collaborated with backend developers to integrate RESTful APIs, ensuring seamless data flow and functionality
- Implement Payment Gateway using Midtrans API for secure and efficient transaction processing
- Developed Reseller Dashboard feature to empower resellers with tools to track sales, commissions, and access marketing resources
- Developed and maintained the company's internal admin dashboard, enhancing operational efficiency

## EDUCATION

---

### SMKN 1 Majalengka

Jul. 2015 – Mar 2018

#### Rekayasa Perangkat Lunak

## SKILLS

---

**Languages** : HTML/CSS, Javascript, Typescript, PHP, SQL

**Framework** : React, Vue, SolidJS, NextJS, NuxtJS, Laravel
